

Aluminum Tunnel

Catalog # 36803

All Aluminum Construction. 3/8" Aluminum rods on 2" centers. 4" locking casters.

Guillotine doors on both ends, and both sides of tunnel are provided.

Horizontal dividers are provided for separating animals within the tunnel.

Stainless steel latches are used on all doors for locking in place.

The tunnel has multiple uses:

- * Capture and contain animals while their cages are being cleaned.
- * Training
- * Transporting animals to new housing, or to another facility.
