

Bio-Containment Chamber

Catalog # 37881

The Bio Containment module allows the housing of NHP's in a microbiological environment that can operate at a BSL-3 level using facility air handling equipment. Fan boxes can be provided, keeping the module independent from surrounding units or facility air handling equipment.

- All doors and openings have mechanical devices for seal compression.
- Room air is drawn into the cage through a HEPA filter on the front door.
- Cages are removable, each cage has a waste pan.
- A removable fan module filters cage air before being exhausted back into the room.
- All doors and windows are made from tempered glass.
- Chambers and cages can be made to accommodate several species of animals. Various sizes are available.

Cage Specifications:

Cages shown are 6.0 Ft.2
All Stainless Steel and Tempered Glass Material
Suitable for 250F Autoclave
