

Single Marmoset

Catalog # 41508

With an interior height of 32" and 6.25 square foot of floor space this cage is intended for single animal housing. Walls consist of 5/16" diameter vertical rods while the floor and ceiling is a 1" x 1" wire panel. A main door provides full access to the cage interior and is secured by spring loaded latching door handle; horizontal animal door is located on the main door. Both doors have provisions for secure latching. Double handled squeeze back is guided by plastic bearing blocks for smooth and quiet operation. Linear perches, fixed wire feed box, cage card holder, and fixed foraging board are also present. The cage is elevated 3' from the base frame. The base frame is constructed of 1-1/2" square tubing and houses four 5" casters with two locking on front of the cage.
