

Bear Resistant Garbage Dumpster

Catalog # 49283

All 304 Stainless Steel construction.

Design will lend itself to the existing equipment currently being used to dump bins.

A potential modular / collapsible design to reduce shipping costs.

Small amount of assembly may be required on site, which may include welding.

Approximate size is 54" Wide x 75" Long, To Be Determined, to fit existing equipment.

Garbage Bin to have skid feet rather than casters.

Main Top Door to hinge open when dumping bin.

Hinged Top Door provided with secure unique Bear Proof Lock.

Pressure release lock design.

This lock will automatically unlock when dump truck picks up bin to dump and automatically re-lock when dump truck returns garbage bin to ground.

Smaller Door within the Top Door for access to throw trash into garbage bin.

Smaller Door may hinge or slide side to side depending on best design option.

Smaller Door to have secure Bear Proof Lock.

Fork Pockets for existing equipment to continue dumping in same fashion.

Small Hole in the bottom to allow liquids to drain out.
