

Socialization Cages

Group #6

Catalog # 41764

The Group #6 cage is a rugged design constructed of all #304 stainless steel. The configuration permits horizontal pairing with other units. The cages are separated into two 5 sq. ft. chambers with removable center divider. Dividers on both sides can pair with the one-over-one socialization rack and provide three levels of socialization; solid, visual, and grooming respectively. A fixed solid perch is below the divider panel is a thermal neutral plastic rimmed in SS tube. Squeeze back is operated by a single handle design. All doors have provisions for use of padlocks, including the horizontal animal door integrated to the hinged main door. Accessories include but not limited to hinged waterline, linear perch, removable feed box and dry waste pan.
