

Adjustable Transfer Box Tower

Catalog # 36780

All Stainless Steel Construction

This one over one Adjustable Transfer Box Tower with removable transfer boxes will connect securely to your rack and cages.

Transfer Boxes are designed to for larger primates, and are made of aluminum for easier lifting.

By simply operating a release lever, the transfer box is infinitely adjustable up or down with a travel of 16-1/2".

Transfer boxes are easily removable and can be used independently of the tower.

Raising and lowering of the transfer boxes is easily done with the help of a weight assisted spring.

Both ends of the transfer box have a door. One side is perforated to view animal.

Tower has two locking and two non-locking
